

INTEGRATION, ALIGNMENT AND EXECUTION AT SCALE

WORKPLAN

INTEGRATED MANUFACTURING FRAMEWORK

Turning manufacturing complexity into
OPERATIONAL CLARITY

WORKPLAN is the ERP solution for the integrated management of the entire manufacturing lifecycle, designed to connect processes, systems and data — ensuring continuity, control and visibility at every stage of production.

— Discover how WORKPLAN can enable your digital manufacturing roadmap

The WORKPLAN framework

From quotation to delivery, fully connected.

01

Quotation & cost analysis

Accurate estimation, margin control and faster response times.

02

Advanced planning

Optimised resource allocation and production planning.

03

Production execution

Real-time tracking of operations and work orders.

04

Monitoring & performance

Full visibility into efficiency, bottlenecks and KPIs.

05

Continuous improvement

Data-driven optimisation and operational refinement.

Integration at the core

ERP, CAD/CAM and shopfloor in a single solution.

Concrete, measurable outcomes

All the benefits of adopting WORKPLAN

- Increased planning accuracy and resource utilisation
- Improved margin control and cost visibility
- Reduced lead times and improved delivery performance
- Enhanced shopfloor efficiency and transparency
- End-to-end operational alignment

"If you can't measure it, you can't improve it."

Why Vero Project Group

Industry expertise

Manufacturing processes and industries.

Consultative approach

Analysis of processes, systems and objectives.

Global reach

Local execution, global scale.
